

Delhivery Rider Ecosystem

Information architecture — combined map of the onboarding app and the FE delivery app

Scope	Detailed — every screen, module, action and state, with scenarios
Approach	As-is structure organised from 39 captured screens, plus marked proposed fixes
Coverage	Onboarding & KYC · FE activation · duty & dispatch · delivery execution · exceptions
Prepared	17 July 2026 · Abhijeet Purandare, Tarmac Design System

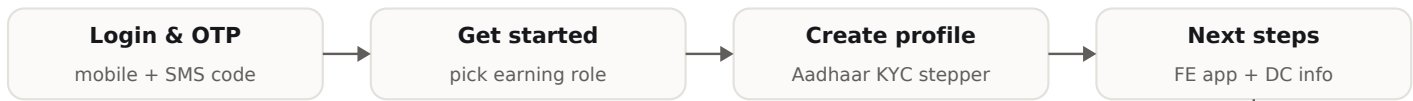

Contents

- 1 · Overview wireflow — six stages, 18 core screens
- 2 · Detailed screen-by-screen architecture
- 3 · Issues found and proposed fixes
- 4 · Appendix — all 39 captured screens, labelled by stage

1 · Overview wireflow

Six stages from first login to exception handling. Both apps are shown as one ecosystem: stages 1-2 live in the Delhivery onboarding app, stages 2-6 in the FE delivery app.

STAGE 1 · ONBOARDING (DELHIVERY APP)

STAGE 2 · HOME HUBS

STAGE 3 · ACTIVATION

STAGE 4 · ON DUTY

STAGE 5 · DELIVER

STAGE 6 · EXCEPTIONS

Coral = daily-use hub screens - gray = transactional - arrows = primary happy path

2 · Detailed screen-by-screen architecture

Row types — gray: information / content · amber: scenario or state · blue: navigation with target · outlined: primary CTA · violet: proposed fix (veto-able). External targets (dialer, maps, camera, WhatsApp) are exits, not screens.

STAGE 1 · ONBOARDING — DELHIVERY APP

Login

+91 mobile number field · conditions of use and privacy links · referral code entry (inline)

State — confirmation sheet: verification code sent to the provided number

CTA — Get OTP → OTP verify

OTP verify

6-digit code boxes · resend timer

State — auto-read via notification (Truecaller overlay observed)

State — max 3 attempts exceeded → retry in 30 min, boxes turn red

CTA — Verify → Get started

Get started

“Choose how you would like to earn” role card

Refer a friend · earn up to ₹2500 → Referral flow (uncaptured)

CTA — Work as Delhivery Executive → Create profile

Create profile — 4-step stepper

stepper: Aadhaar · Vehicle · Payout · Location · “fill in 5 mins” banner

Aadhaar number field · “details remain secure” note · OTP sent to linked mobile

State — loaders: generating OTP → verifying Aadhaar

State — OTP max attempts exceeded → retry in 30 min

verified details: name, gender, DOB, father's name, address, pincode

State — father's name empty → blocking validation banner

Vehicle → Payout → Location steps (uncaptured)

CTA — Next (all steps complete) → Next steps

Next steps (welcome)

FE app checklist: driving licence number, bank details, PAN card

reach your workplace: DC contact person, address, distance

Get directions → OS maps (external)

CTA — Download FE app → FE home

Delhivery app home

greeting · total earnings ₹0.0 · executive stats (payout, deliveries, hours)

View details → Earnings (uncaptured)

Refer now → Referral flow (uncaptured)

STAGE 2 · FE APP — ACTIVATION

FE home — one screen, two states

greeting · avatar · notification bell (target uncaptured)

state A: documents pending

documents stepper: driving license → PAN card → bank details

[Add documents → Driving licence sheet](#)

[Book slots banner → View slots](#)

State — loaders: downloading image model · getting referral banner data

state B: activated

upcoming slot card · Premier League ranking banner (uncaptured) · chatbot FAB (uncaptured)

[View slots → View slots](#)

CTA — Start delivering → Selfie gate

Proposed — persistent bottom nav: Home · Shipments · Summary

Driving licence

DL number field · note: DOB must match Aadhaar

State — Accepting... busy state on submit

CTA — Accept → PAN

PAN

PAN number entry (inferred)

State — success sheet: PAN details verified · PAN-Aadhaar linked

CTA — Verify → Bank details

Bank details (uncaptured)

account number, IFSC, holder name — flow not in screenshots

CTA — Submit → FE home (activated)

View slots

DC header: Bangalore_Mahadevapura_D · help icon

week strip (2 slots / 0 / 0) · tabs: upcoming, history

slot cards: full day 9:00–7:00 · potential earning ₹1120

CTA — Book slots → FE home

STAGE 3 · ON DUTY — DISPATCH

Selfie gate (attendance)

checklist: helmet visible · well-lit area · Delhivery T-shirt

CTA — Take selfie → camera (external) → Dispatch

Dispatch creation

empty state: no deliveries assigned — “create dispatch” to scan

[Punch out → FE home](#)

CTA — Continue dispatch creation → scanner (external) → Shipments

Safety interstitial

"Every shipment matters — ride slow, stay safe" card

CTA — Dismiss → Shipments

Shipments list

map with rider position · draggable bottom sheet · fullscreen / locate / map-type controls

tabs: ALL (5) · FWD (4) · RVP (1) · Direct (0)

shipment card: consignee, seller, address · tags: COD / prepaid / REPL / priority / flash

per card: call → dialer (external) · navigate → maps (external)

search · priority (lightning) filter · hamburger menu (uncaptured)

State — RVP pickup execution — not captured

[Summary tab → Summary](#)

CTA — Shipment card → Order detail

Summary

escalation for today: closed 0/1 priority · rescued 0/0 fake remarks

[attempted progress 0/5 — delivered / picked up / returned / pending → Shipments \(filtered\)](#)

total collection: cash collected · card-UPI-wallet · cash submitted

State — cash submission flow — dead end today (uncaptured)

[Proposed — Submit cash → Cash submission screen](#)

STAGE 4 · DELIVERY EXECUTION

Order detail

AWB + order ID header · consignee with COD/prepaid tag, delivery window, call → dialer

address + navigate → maps (external) · geofence map with "x m away" pin

item description · seller · amount + payment status

State — checks banner: call attempted 0/2 · 1/2 · 2/2 · call connected

State — geofence verified (green) vs NOT verified (red radius) — blocks NSL: "activation requires passing checks"

State — payment pending vs payment successful

[Collect ₹ \(COD, unpaid\) → QR payment](#)

[Mark undelivered → NSL reasons](#)

CTA — Deliver (prepaid or paid) → Proof of delivery

QR payment

amount "you are paying" · UPI QR code

State — payment success banner + full-screen confirmation

State — payment pending → red PENDING retry sheet with close

CTA — Done → Order detail (payment successful)

Proof of delivery

delivery recipient radios: consignee · mailroom/security · other as instructed

State — QR-paid order: “code/QR verified delivery” + receiver details auto-checked

photo proof: take 1 image · ask customer permission · Capture → camera (external)

signature pad · retry/clear

State — “Delivery successful!” dialog

CTA — Submit / Complete → Shipments

Mark undelivered (NSL)

checks header · note: NSL activation requires passing checks

reason cards: consignee unavailable · delivery rescheduled by customer · consignee refused / order cancelled

State — “not attempted” — locked once checks pass

Others (all unlisted reasons) → sub-reasons (uncaptured)

audio feedback: mandatory recording, clearly stating the reason, before proceed

State — reschedule selected → WBN dialog: send WhatsApp OTP / cancel

Send WhatsApp OTP → Reschedule verify

CTA — Proceed → Shipments (status updated)

Reschedule verify

enter 4-digit verification code from customer · resend OTP

call consignee → dialer (external) · “get Delhivery app” QR upsell for the customer

CTA — Submit → Shipments (rescheduled)

PROPOSED ADDITIONS

Cash submission (proposed fix)

day's cash total · DC handover reference · TL confirmation

State — mismatch between collected and submitted → flag

CTA — Confirm submission → Summary

Profile and menu drawer (proposed fix)

home for the uncaptured hamburger: profile, earnings, slot history, help/chatbot, safety content, logout

Slot history → View slots

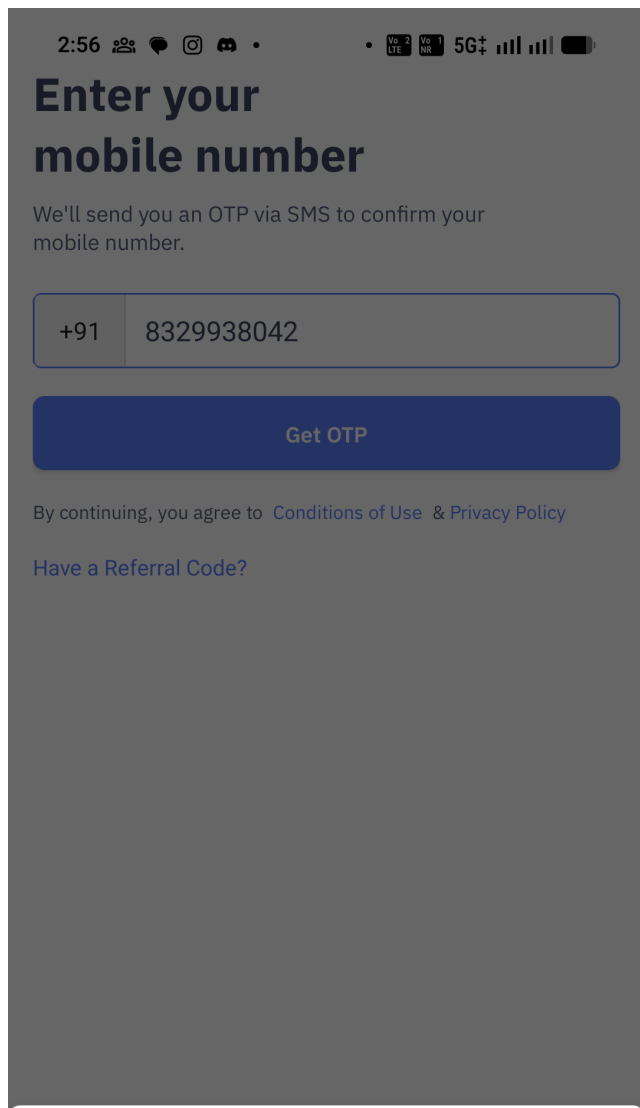

3 • Issues found and proposed fixes

Dead end — cash	Summary shows “Cash Submitted ₹0.00” but no path to submit cash exists in the captured flows. Proposed: a Cash submission screen reachable from Summary.
Orphaned targets	Six taps lead to screens missing from the capture set: Earnings “View details”, Referral flow, Premier League ranking, notification bell, hamburger menu, NSL “Others” sub-reasons. Audit whether they exist or are unbuilt.
No persistent global nav	FE home, Shipments and Summary are three hubs with no shared bottom nav; returning Home from duty context is not visible. Proposed: fixed 3-tab bottom nav (Home / Shipments / Summary) — the highest-impact fix for one-handed, on-road use.
Duplicated home	Docs-pending home and activated home are one screen with two states — modelled as a single stateful screen so design doesn't fork.
RVP gap	RVP has a tab and a count but no captured pickup-execution flow — the reverse-pickup counterpart of delivery is a mapping gap.
Field-driver principles applied	NSL, POD and payment are modelled as states/branches of Order detail so a rider is never more than 2 taps from Deliver, Collect or Mark undelivered; every blocking state (geofence, call attempts) surfaces on the screen it blocks. Backlog: offline queue for POD submissions; auto-advance to nearest next shipment after Complete.

4 · Appendix — captured screens

All 39 screenshots, ordered by journey stage and labelled with the screen they evidence.

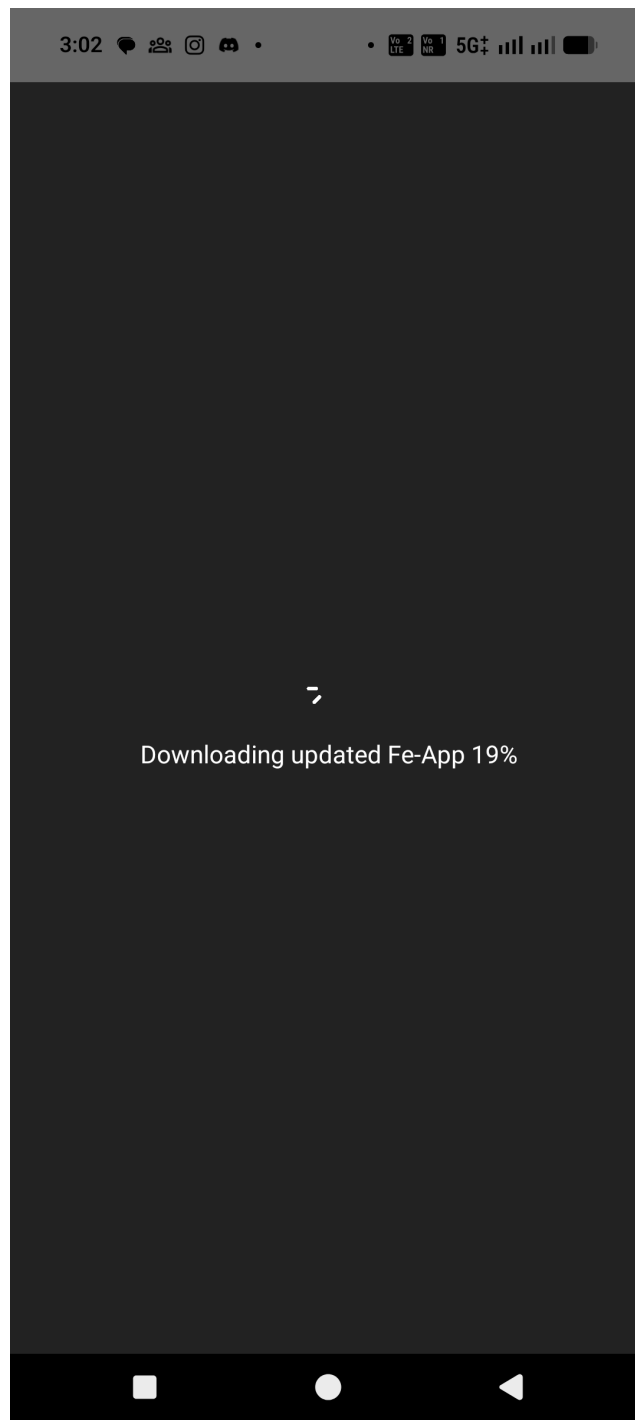

Stage 1 · Onboarding

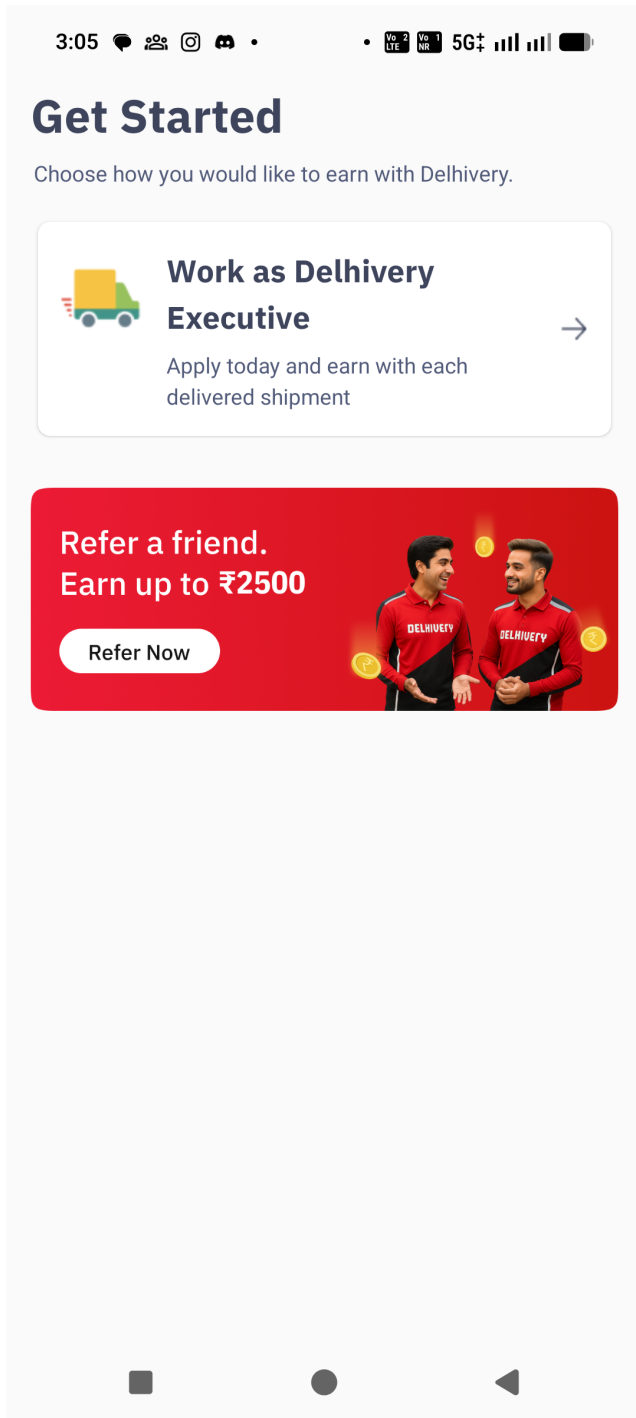

Verification code is sent to the provided mobile number.

Login — OTP sent confirmation

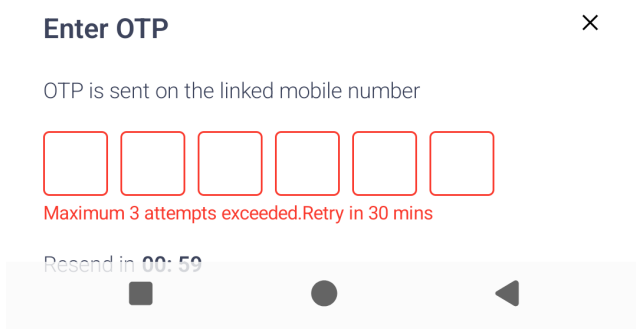

FE app update download loader

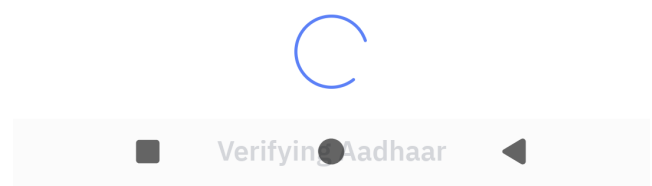

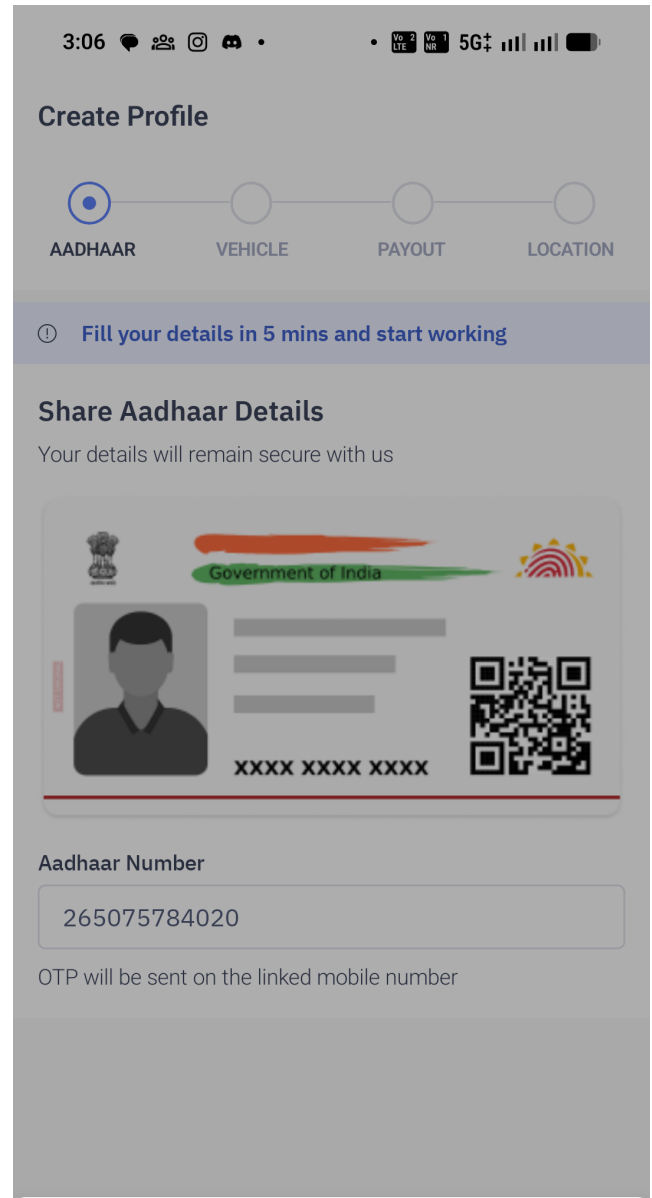

Get started — role selection

Aadhaar entry — generating OTP

Aadhaar OTP — max attempts error

Verifying Aadhaar loader
